**ARB** 4X4 ACCESSORIES

# MAZDA BT-50

# ACCESSORIES

**ARB 4x4 Accessories is Australia's leading manufacturer and distributor of 4WD equipment. Whether you use your vehicle for work or play, fishing or boating, caravanning or camping, we can provide reliable equipment to suit your needs.**

Many people view 4WD equipment upgrades as essential only when heading off road, however there are plenty of advantages for those vehicles that are more often on road. Fitting a canopy to a ute will help keep gear dry and protected, roof racks will allow you to carry bulky items, and suspension upgrades offer improved ride performance over all road surfaces, especially when towing a trailer or boat. ARB also sells a range of other products including protection equipment, recovery gear and a large selection of general accessories.

To ensure our products consistently meet your expectations, ARB invests substantial amounts of capital into research, design and manufacturing each year. We ensure that our products are built to last, and meet all relevant industry standards. Many of

our accessories are designed and manufactured at ARB's head office in Melbourne.

An extensive network of ARB stores and authorised distributors can be found throughout Australia and the world, meaning you can access the right gear and assistance no matter how far your travels take you.

With ARB, you can be assured you're getting quality products, reliable service and sound advice.

This booklet provides information on a selection of the accessories ARB has available for your vehicle.

To get a copy of our free, full size catalogue, please contact us at one of the locations listed on the back cover or view it online at [arb.com.au](http://arb.com.au).

# PROTECTION EQUIPMENT

**Vehicle protection is one of the main priorities for owners of four wheel drives and commercial vehicles.**

Bull bars, rear bars and side rails and steps will help prevent expensive panel damage, especially if the vehicle is going to head off road. All our protection gear has been designed for maximum strength and style, and is finished in a durable powder coat. ARB also distributes a range of electric winches that can be fitted to our winch bull bars for extra peace of mind when facing a recovery situation.

# DELUXE BULL BARS

ARB's Deluxe bull bars are air bag compatible and manufactured from steel for the ultimate in frontal protection. Practical bull bar features include electric winch provision, recessed indicators, jacking provision, mounting points for ARB or IPF driving and fog lights, and twin CB aerials.

# SAHARA BARS

Available with or without a polished chrome or matte black tube, the ARB Sahara bar can be tailored to suit your requirements and is one of the most technologically advanced protection systems on the market. Like the Deluxe bar, our Sahara bars are air bag compatible, feature a split pan design and can be used as a platform to fit ARB or IPF driving lights and a Warn winch.

# SMART BARS

Manufactured from polyethylene plastic the SmartBar is a lighter alternative to steel bars. Available in black, white and silver grey, the SmartBar is air bag compatible with a winch compatible option.

Supplied with two aerial points and durable LED parker/indicator lights. The SmartBar is environmentally friendly, easy to install and is compatible with original vehicle fog lamps.

# REAR STEP TOW BARS

**Whether you're towing a boat, caravan or trailer, it's imperative that the vehicle is equipped with an ADR approved tow bar.**

In addition to fulfilling this function, ARB's rear step tow bar will provide protection for vulnerable rear body panels.

# UNDER VEHICLE PROTECTION

**Protect your 4WD's underbody no matter which road you take.**

ARB's model specific underbody protection panels are easily removed for vehicle servicing and are engineered to protect vital components including the sump, transmission and transfer case.

## FEATURES

- Vehicle specific design
- Laser cut, 3mm pressed and folded sheet steel adds up to 56% more strength than standard folded steel
- Zinc plated and powder coated in a silver textured finish
- Recessed mounting bolts are protected and easy to remove for vehicle servicing
- All steel components protected with either powder coat or zinc plating
- Compatible with all ARB products including the ARB recovery point

# RECOVERY POINTS

ARB's vehicle specific recovery point range offers a safe and secure winching point during vehicle recovery. Manufactured from steel plate, the recovery points are designed to take the guesswork out of shackle and snatch strap selection, with all ARB recovery points specifically rated for use with a 4.75t bow shackle and 8,000kg snatch strap.

# PROTECTION STEPS

ARB protection steps offer similar benefits to conventional side steps, such as improved vehicle access and a reduction in stone chips caused by road debris. Unlike most other brands of steps, they act as a strong barrier between your vehicle and rock ledges encountered in off road driving, and are far less likely to sustain damage. Protection steps without the front side rail are also available as an alternative option for your Mazda BT-50.

# ASCENT CANOPY

ARB's Australian designed and assembled canopies broaden the usability of your vehicle with increased storage space and the ability to lock up your valuables.

ARB's Ascent canopy for the Mazda BT50 features remote central locking door and windows, with a vanishing edge shell design for an outstanding appearance from all angles.

**Ascent is our feature packed flagship canopy, offering the highest level of usability and comfort in an ultra-premium design.**

Designed and made in Australia the ARB Ascent canopy is packed with features and is the perfect accessory to complement the modern day vehicle. Available in standard size with several window options available.

**ASCENT CANOPY FEATURES:**

- Over rail design blends the canopy into the vehicle with no visible seal, creating a sleek vanishing edge design for a sophisticated look
- Frameless tinted side windows – lift up and pop out style available with 5mm thick tempered automotive glass
- The windows and rear door allow for slam shut and drop close operation
- Lift up side windows and rear door have a high head clearance when open, allowing access with minimal restriction
- Conveniently located electronic switches for unlocking lift up windows and door
- Frameless windows with slam shut latches ensure the canopy closes securely without the need for external locking handles
- Purpose designed spoiler fits with the canopy's sleek design lines and includes exterior LED brake light
- Powerful interior LED is automatically operated by rear door opening or by on/off switch
- Internal, low intrusion support frames for roof rack and bar fitment
- High flowing, forward facing intake canopy vent comes fitted as standard and pressurises the interior of the canopy, inhibiting dust ingress through the tailgate area
- Plug-and-play wiring harness integrates directly with the vehicle's central locking system, allowing owners to lock and unlock the canopy directly from the existing vehicle key
- Electronic switch included in the single door handle for door unlock

(Top Left) The frameless windows are available as lift up or pop out.

(Top Right & Middle Left) Plug-and-play wiring harness that integrates directly with the vehicle's central locking system.

(Bottom Left) An interior LED light makes it easier to gather the essentials in dark conditions with on/off/door function.

(Middle Right) Pressurising the interior of the canopy, the canopy vent greatly reduces dust intake.

(Bottom Right) A range of roof racks and bars have been designed to fit the Ascent canopy.

# CLASSIC CANOPY

## CLASSIC CANOPY FEATURES:

- Individual designs for each vehicle
- Heavy duty one-piece shell
- Thermal-formed from ABS sheet
- Choice of sliding side windows or lift up windows
- Lift up front window for improved visibility and easy cleaning of glass
- Available in textured or smooth exterior finish
- Double locking handles on rear door
- Lockable, sliding windows
- Premium quality UV stable finish
- Tinted and tempered 'safety' glass in side windows and doors
- Easy wipe smooth interior
- Rear high mount LED brake light and interior light
- Secure, full length mounting system
- Weatherproof design includes inbuilt rain gutters
- Rated to carry a 100kg load with an approved ARB roof rack/bar system, complying with relevant Australian Standards

# CANOPY ACCESSORIES

While fitting an ARB Classic or Ascent canopy to your ute will make it a more practical vehicle, there are a number of options available to tailor the canopy to your individual needs. From window configurations to roof bars, you can choose the accessories that best suit your lifestyle.

As every canopy is built to order, ARB can customise window configuration to suit your requirements.

## SLIDING WINDOWS

Sliding side windows are manufactured with tempered and tinted safety glass. Flyscreens can be fitted to these for increased practicality, especially if the vehicle is to be used as an occasional sleeping area.

## LIFT UP WINDOWS

Lift up side windows allow easy access from the side of your utility. This option is available on one or both sides of the vehicle. All lift up windows are externally lockable with keyed alike access to the rear door.

## SECURITY MESH

Laser cut from solid steel sheet and powder coated, security mesh is available for all sliding windows for extra security. It is also available to go over the front sliding window to protect cab occupants from equipment stored in the canopy.

## UTE LINERS

Made from high impact resistant, UV stable polyethylene, vacuum formed to the exact shape of your vehicle tub, ARB manufactures both over and under rail ute liners. Suitable for all ARB canopies, an ARB ute liner will help protect your ute tub from unsightly scratches, dents and corrosion caused by gear moving around, leaking, or breaking in the back of the vehicle.

## CANOPY VENT

The innovative slimline, high flow canopy vent is the ideal solution to reduce dust ingress and improve airflow for your Classic or Ascent canopy. With the vent facing the front of the vehicle, the canopy interior is pressurised, reducing dust from entering the area via the rear door or tailgate when travelling off road. The ARB canopy vent is available as an option for the Classic and a standard feature for the Ascent.

# UTE LIDS

**A popular alternative to a canopy, a ute lid will provide protection and security for your belongings.**

Available for the Mazda BT-50 dual cab, these stylish hard covers are durable and allow easy access to the gear in the back of your vehicle and also comes with a 3 year Australia wide warranty.

## **FEATURES:**

- Rugged yet lightweight design
- Manufactured from UV stabilised, ABS material
- High quality automotive paint
- Weather tight wrap over design with internal seals to reduce water ingress
- Quick and easy to remove
- No drill clamp system
- High-lift hinge system to provide easy access to cargo
- Twin struts provide for a self supported open lid and cushioned closing
- Easy reach cord to assist with lowering the lid
- Central push button lock
- Two stage side slam latches
- 3 year Australia wide warranty

**An ARB Air Locker is the ultimate off road accessory. At the flick of a dash mounted switch, you'll be able to tackle unpredictable terrain in a more controlled manner. Front and rear Air Lockers are available to give you the confidence to negotiate all kinds of conditions, from off road trails to wet, muddy worksites.**

Designed, tested and built in Australia, an ARB Air Locker is a driver controlled locking differential that delivers the traction needed to keep moving in the toughest terrain.

Manually operated from within the vehicle, the Air Locker can be engaged with the flick of a switch.

An on-board air compressor releases a small burst of high pressure air into the differential, which in turn engages the locking mechanism. This prevents the wheels from turning independently and allows for a more controlled driving approach in steep or unpredictable conditions. A second flick of the switch disengages the Air Locker, returning it to a standard 'open' style of differential.

#### **AIR LOCKER FEATURES:**

- Vastly improved traction means less reliance on momentum, thus reducing the likelihood of vehicle damage and environmental impact
- Easy, convenient operation allows the user to concentrate on the terrain without leaving the comfort and safety of the driver's seat
- Provides 100% traction on demand without affecting on road drivability or driveline wear
- Ultra durable and extremely strong – only the highest quality materials used in construction
- Incredibly simple yet effective two piece design that employs minimal moving parts, thereby ensuring maximum reliability
- Thoroughly tested and proven design – trusted and used in over 100 countries around the world
- 5 year unlimited km warranty

# ROOF RACKS AND ROOF BARS

**Equipping a vehicle with a roof rack or roof bar system is the ideal solution for carrying bulky items or to simply free up space in the vehicle.**

Whether you need to carry extra long items such as ladders or timber for work, or just need more space for gear on your next holiday, ARB has a wide range of roof rack and roof bar options available.

### CANOPY ROOF RACKS

**Available in either a steel or aluminium version, an ARB canopy roof rack is the ideal way to easily transport bulky items.**

ARB's steel racks are manufactured with round steel tubing for maximum strength and aerodynamics, while the aluminium rack weighs significantly less and comes standard with a mesh floor.

An optional roof rack roller is available for our steel canopy roof rack, which makes the loading of longer items, such as timber, easier.

ARB canopy roof racks are available to fit:

- Mazda BT-50 dual cab with standard roof canopy

### CAB RACKS

**ARB's cab racks are securely mounted to the vehicle's roof and are built to withstand tough Outback conditions.**

The cab racks are available for Mazda BT-50 models in both Deluxe and trade styles, with the trade design being open at both ends, allowing for extra long items to be carried.

Optional extras include roof rack wind deflectors (Deluxe only) which will help reduce wind noise, and roof rack bags to give your belongings more protection from dust and rain.

ARB cab racks are available to fit:

- Mazda BT-50 dual cab

### CANOPY ROOF BARS

**An ARB canopy roof bar system consists of a pair of roof bars that attach to the outside of the canopy, which are supported by our specifically designed internal steel frame.**

The Thule roof bar brand offers a massive selection of trade and recreational accessories, making this an extremely versatile system for carrying a wide variety of loads.

With a standard roof canopy, this system can be coupled with cab mounted bars to accommodate extra long loads.

ARB canopy roof bar systems are available to fit:

- Mazda BT-50 dual cab with standard roof canopy
- Mazda BT-50 extra cab with standard roof canopy

**Old Man Emu has been the choice of suspension for 4WDers for many years due to the outstanding ride performance it delivers over all road surfaces.**

Integrated suspension packages are available to improve ride, handling and load carrying ability for those that regularly tow heavy loads, drive long distances or want superior performance.

#### THE COMPLETE OLD MAN EMU RANGE INCLUDES:

- Nitrocharger Sport shock absorbers
- Steering stabilisers
- Torsion bars
- Bushes and hardware
- Coil and leaf springs
- GVM upgrades
- Greasable shackles

#### NITROCHARGER SPORT

The Nitrocharger Sport range takes the next step in vehicle specific valving and offers the most cohesive, balanced and finely tuned valving system on the market.

Nitrocharger Sport shock absorbers are an integral part of Old Man Emu's suspension systems. Fitting a set of Nitrocharger Sport shocks will make a difference that's noticeable every time the vehicle is driven.

Built in Australia and trusted by 4WDers around the world, OME Nitrocharger Sport shock absorbers set the standard in fine tuning and ride comfort in any terrain, and simply outperform the competition. This is made possible by matching Nitrocharger Sport shocks to the appropriate springs, resulting in the ultimate vehicle ride performance.

#### SPRINGS

Old Man Emu designs a line of coil and leaf springs, enabling the installer to match the most appropriate springs to the intended application. While ride height increases are attained, emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system, designed specifically to suit your vehicle. A 4WD equipped with this combination will exhibit better towing and load carrying characteristics, improved wheel travel, and will ride and handle better over any road surface.

#### GVM UPGRADES

Whether you're carrying tools of the trade or packing up the 4x4 for an extended trip, your vehicle can become dangerous and illegal if it exceeds the allocated gross vehicle mass (GVM). To combat these issues, ARB offers Old Man Emu GVM upgrades in line with ADR requirements for a number of new, unregistered vehicles. Vehicle manufacturers set front and rear axle limits for each of their vehicles. ARB follows sound engineering principals by ensuring all Old Man Emu GVM upgrades fit within these combined axle limits, ensuring safety and reliability. Speak to your local ARB store or authorised stockist for more information on GVM upgrades.

#### HARDWARE

Complete suspension integration is possible with Old Man Emu's line of hardware and accessories such as greasable shackles, bushes and steering stabilisers.

# OTHER ARB ACCESSORIES

## ARB LED & IPF LIGHTS

**A vehicle lighting upgrade can deliver outstanding improvements for night and foul weather driving.**

ARB's Intensity LED driving lights perform brilliantly in all conditions. Producing a white light that is the closest possible colour to sunlight, the LED lights reduce eye strain and driver fatigue. ARB also distributes the IPF range of driving and fog lights, in addition to a large range of replacement headlamp bulbs.

## RECOVERY EQUIPMENT

**Recovery gear is essential to carry when venturing off sealed roads.**

Along with a range of general equipment including snatch straps, tree trunk protectors, cable dampers and Hi-Lift jacks, ARB also distributes a range of electric winches and the Magnum hand winch.

## ARB REVERSING CAMERA

**Offering 160° rear view visibility, ARB's reversing camera and monitor system incorporates a replacement mirror with a quality OLED screen and speaker.**

The compact camera is waterproof (IP68 rating) and uses a unique licence plate mounting bracket that utilises existing fixtures to ensure it can be easily fitted. The camera is also available as an auxiliary accessory and incorporates a 5m cable length to ensure it can be fitted to the front or rear of your vehicle.

### ARB FRIDGE FREEZERS

Available in four practical sizes (35L, 47L, 60L & 78L), the ARB Fridge Freezer has been specifically engineered for off road use.

Featuring a practical design, optimised capacity and a high quality cooling system, an ARB Fridge Freezer is the hassle-free answer to keeping your food and drinks fresh or chilled on your travelling adventures.

### AIR COMPRESSORS

Whether you need to operate Air Lockers or inflate tyres and camping equipment, ARB has a range of vehicle mounted and portable compressors to suit your needs.

To improve traction on sand and other off road surfaces, deflating your vehicle's tyres is the first step to avoiding a recovery situation. For this reason, and especially for those vehicles fitted with ARB Air Lockers, an air compressor is an essential accessory.

### ARB OUTBACK SOLUTIONS DRAWERS

Suitable for many vehicles, the versatile Outback Solutions Modular Roller Drawer Systems range is packed with versatility.

Sold exclusively by ARB, the Outback Solutions range is backed by a comprehensive two year warranty and comes in a number of configurations to suit your storage requirements and vehicle.

### ARB'S RANGE OF ACCESSORIES FOR MAZDA BT-50 VEHICLES\* INCLUDES:

- ARB Deluxe bull bars and winch bars
- ARB Sahara bars
- ARB side rails and steps
- ARB rear step tow bars
- ARB and IPF lights
- ARB under vehicle protection
- ARB canopies
- ARB ute lids
- ARB Air Locker locking differentials
- Old Man Emu Suspension
- ARB roof racks
- ARB canopy roof racks
- ARB auxiliary batteries
- Ute liners
- Thule and Rhino roof bars
- Safari snorkels
- Outback Solutions drawers
- Long Ranger fuel and water tanks
- Clearview towing mirrors

### SAFARI SNORKELS

**A Safari snorkel will significantly reduce the likelihood of costly engine damage that can result from dust, debris and water ingestion.**

It does this by relocating your engine's air intake point from the relatively low and vulnerable position under the bonnet to a much higher and safer location where a constant source of cool, clean, dry air is available.

For more information, please contact ARB for a free copy of our full size catalogue. See back cover for your nearest location.

\*Not all accessories are available for all models. Please contact ARB for the complete range for your particular vehicle.
