ARB 4X4 ACCESSORIES

ARB 4x4 Accessories is Australia's leading manufacturer and distributor of 4WD equipment. Whether you use your vehicle for work or play, fishing or boating, caravanning or camping, we can provide reliable equipment to suit your needs.

Many people view 4WD equipment upgrades as essential only when heading off road, however there are plenty of advantages for those vehicles that are more often on road. Fitting roof racks will allow you to carry bulky items, and suspension upgrades offer improved ride performance over all road surfaces, especially when towing a trailer or boat. ARB also sells a range of other products including protection equipment, recovery gear and a large selection of general accessories.

To ensure our products consistently meet your expectations, ARB invests substantial amounts of capital into research, design and manufacturing each year. We ensure that our products are built to last, and meet all relevant industry standards. Many of our accessories are designed and manufactured from scratch at ARB's head office in Melbourne and all products manufactured or solely distributed by us have a minimum two year nationwide warranty.

An extensive network of ARB stores and authorised distributors can be found throughout Australia and the world, meaning you can access the right gear no matter how far your travels take you.

With ARB, you can be assured you're getting quality products, reliable service and sound advice.

This booklet provides information on a selection of the accessories ARB has available for your vehicle. To get a copy of our free, full size catalogue, please contact us at one of the locations listed on the back cover.

PROTECTION EQUIPMENT

Vehicle protection is one of the main priorities for owners of four wheel drives and commercial vehicles.

Bull bars, rear bars and side rails and steps will help prevent expensive panel damage, especially if the vehicle is going to head off road. All our protection gear has been designed for maximum strength and style, and is finished in a durable powder coat, with the added option of colour coding. ARB also distributes a range of electric winches that can be fitted to our winch bull bars for extra peace of mind when facing a recovery situation.

DELUXE BARS

ARB's Deluxe bull and winch bars are air bag compatible (where applicable) and manufactured from steel for the ultimate in frontal protection. Depending on the model, practical bull bar features may include winch provision (to suit a range of electric winches), recessed indicators, jacking provisions, tow points, mounting points for driving and fog lights, and twin CB antennas.

ARB Deluxe bull bars are available to fit:

- JK Wrangler
- Grand Cherokee

GRAND CHEROKEE

ARB's Deluxe bull bar for the Grand Cherokee incorporates a sophisticated, air bag compatible mounting system that also strengthens the chassis of the vehicle, giving you confidence in the most demanding 4WD situations.

JK WRANGLER

This feature packed Deluxe bull bar includes winch and driving light provisions, recessed indicators, jacking points and provision for twin CB antennas.

ARB winch bumpers are available to fit:

- JK Wrangler

REAR BARS

For the ultimate in rear vehicle protection, ARB's rear bar is available to suit the JK Wrangler and incorporates a recessed bumper to allow larger sized tyres to be fitted to the factory door-mounted tyre carrier.

Dual Hi-Lift jacking mounts

REAR BAR FEATURES:

- Manufactured from 3mm steel for maximum strength
- Incorporates recess in bumper to allow fitment of most 35" tyres
- Durable black powder coat finish with colour coding available
- Dual Hi-Lift jacking mounts incorporated
- Low slip tread in centre recess provides easy access to cargo area
- Suitable to be used with the factory tow hook and Jeep original equipment tow bar

OTHER PROTECTION EQUIPMENT

DIFFERENTIAL COVER AND UNDER VEHICLE PROTECTION

Fabricated from high tensile solid nodular iron that is tougher and harder than solid carbon steel, ARB's Differential Cover is the ideal piece of equipment to protect your JK Air Locker and ring & pinion set-up from the impacts of challenging off road trails and competition rock crawling. Incorporating numerous features, the low profile shape of the housing maximises the running gear clearance around the unit and provides optimal approach and departure angles.

Protect your 4WD's underbody no matter which road you take. Specific underbody protection panels are easily removed for vehicle servicing and are engineered to protect vital components including sump, transmission and transfer case.

ROCKER RAILS

Rocker rails are available for the JK Wrangler to provide an enormous amount of protection for the vulnerable side panels of your vehicle, especially in steep, rocky terrain. Manufactured from tough, tubular steel for the ultimate in strength and durability, these rocker rails come in a black powder coat with the option to colour code.

An ARB Air Locker is the ultimate off road accessory. At the flick of a dash mounted switch, you'll be able to tackle unpredictable terrain in a more controlled manner. Front and rear Air Lockers are available to give you the confidence to negotiate all kinds of conditions, from off road trails to wet, muddy worksites.

Designed, tested and built in Australia, an ARB Air Locker is a driver controlled locking differential that delivers the traction needed to keep moving in the toughest terrain.

Manually operated from within the vehicle, the Air Locker can be engaged with the flick of a switch. An on-board air compressor releases a small burst of high pressure air into the differential, which in turn engages the locking mechanism. This prevents the wheels from turning independently and allows for a more controlled driving approach in steep or unpredictable conditions. A second flick of the switch disengages the Air Locker, returning it to a standard "open" style of differential.

- Available for the JK Wrangler

AIR LOCKER FEATURES:

- Vastly improved traction means less reliance on momentum, thus reducing the likelihood of vehicle damage and environmental impact
- Easy, convenient operation allows the user to concentrate on the terrain without leaving the comfort and safety of the driver's seat
- Provides 100% traction on demand without affecting on road drivability or driveline wear
- Ultra durable and extremely strong – only the highest quality materials used in construction
- Incredibly simple yet effective two piece design that employs minimal moving parts, thereby ensuring maximum reliability
- Thoroughly tested and proven design – trusted and used in over 100 countries around the world
- 5 year warranty

OLD MAN EMU

Old Man Emu has been the choice of suspension for 4WDers for many years due to the outstanding ride performance it delivers over all road surfaces. Integrated suspension packages are available to improve ride, handling and load carrying ability, which is especially beneficial if you regularly tow heavy loads or drive long distances.

NITROCHARGER SPORT

The Nitrocharger Sport range takes the next step in vehicle specific valving and offers the most cohesive, balanced and finely tuned valving system on the market.

Nitrocharger Sport shock absorbers are an integral part of Old Man Emu's suspension systems. Fitting a set of Nitrocharger Sport shocks will make a difference that's noticeable every time the vehicle is driven.

Built in Australia and trusted by 4WDers around the world, OME Nitrocharger Sport shock absorbers set the standard in fine tuning and ride comfort in any terrain, and simply outperform the competition. This is made possible by matching Nitrocharger Sport shocks to the appropriate springs, resulting in the ultimate vehicle ride performance.

SPRINGS

Old Man Emu designs a line of coil and leaf springs, catering for all suspension setups and enabling the installer to match the most appropriate springs to the intended application. While ride height increases are attained, emphasis is placed on ride control improvements. Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system, designed specifically to suit your vehicle. A 4WD equipped with this combination will exhibit better towing and load carrying characteristics, improved wheel travel, and will ride and handle better over any road surface.

HARDWARE

Complete suspension integration is possible with Old Man Emu's line of hardware and accessories such as greasable shackles, bushes and steering stabilisers.

- Available for the JK Wrangler and Grand Cherokee
